

Lead-Free Capability of ERSA Soldering Systems and Devices

Certification – ERSA Soldering iron Tips:

i-Tip 102 Series, 612 Series, 212 Series, 832/842/852 Series, and 422 Series

ERSA confirms that all ERSA series soldering tips are ROHS conform. ERSA confirms the capability of these products for processing conventional lead free solder alloys (groups SnCu, SnAG, SnAgCu).

This confirmation is limited to the application area of the ERSA products and their proper use. Verification of the process-related critical parameters is the responsibility of the user of the soldering device. No guarantee is offered for wearing parts.

For additional questions please always include the serial number of the device.
