Fibox Stainless Steel Enclosures

Fibox industrial enclosures and cabinets are manufactured from stainless steel. They are used in areas particularly exposed to aggressive conditions.

Enclosures are available for both free-standing and wall-mounting.

Typically stainless steel enclosures are used in indoor and outdoor installations that have constant exposure to dust, water and other contaminants.

The high degree of protection IP 65 ensures proper sealing and application in both internal and external installations.

Enclosure solutions are available with a wide variety of accessories to be configured to suit the specifics of an application.

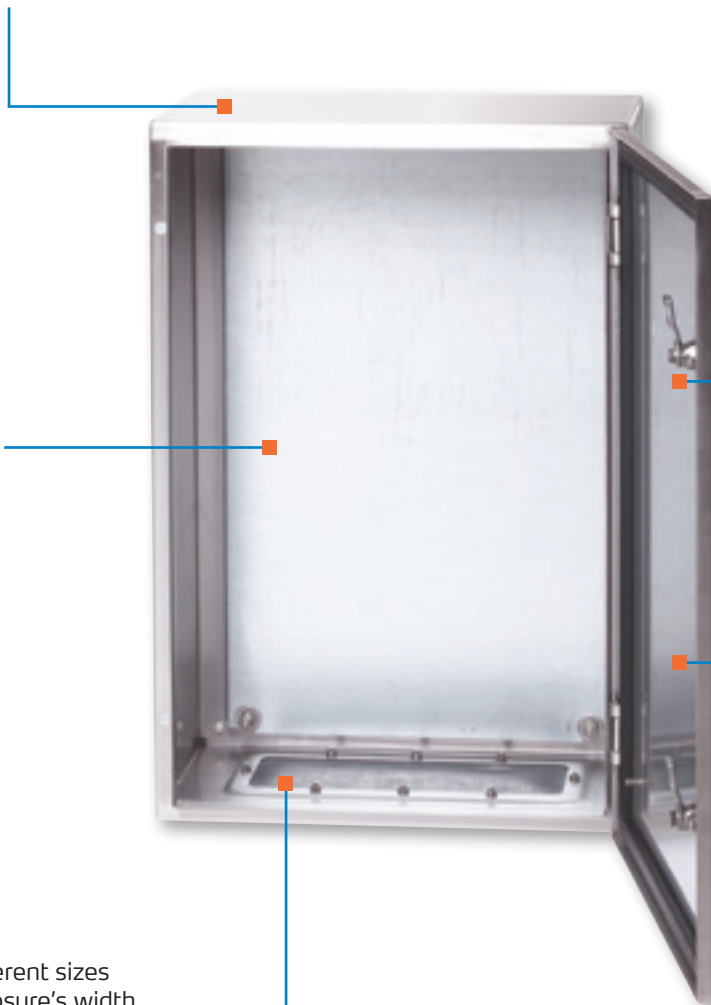

CAB SL IP 65 - Enclosures

Body: Welded stainless steel structure 1,25 or 1,5 mm thick

Mounting plate:

Zinc coated steel plate 2 mm thick
