Revere

ACB Self Aligning Mount

DESCRIPTION

The ACB self aligning silo mount, combined with the ACB load cell family, provides an ideal solution for process control, batch weighing, silo/hoppers and belt scale applications.

The ACB mount permits controlled movement in all directions. The design allows the cell to be fitted after installation of the mount.

Unless major load movement is anticipated, the ACB mount eliminates the need for stay rods. An optional stay rod assembly, which can be bolted to the mount when required, is available.

FEATURES

- Capacities: 250 2000kg
- Hardened components at all bearing surfaces
- Rocker pin load introduction
- Mechanical protection of the critical load introduction area
- Built in horizontal movement control and lift-off protection
- Load cell (re)placement after installation of the mount

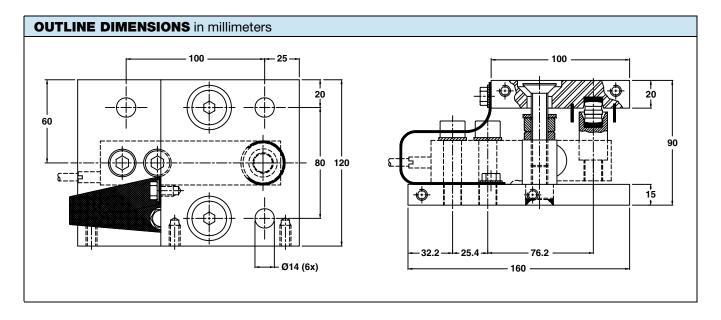

OPTIONAL FEATURES

- Stainless steel or Nickel plated steel versions available
- · Optional stay rod assembly
- Can be used also for ACB 0.5 2ton

APPLICATIONS

- · Process control
- Batch weighing
- Silo/hopper weighing
- Belt scale weighing

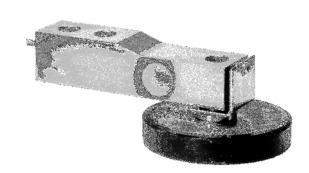

The ACB foot assemblies, together with the ACB load cell family, are an ideal solution for medium capacity belt, pallet and platform scales.

The stainless steel height adjustable and non-adjustable foot assemblies provide excellent load introduction to the load cell while maintaining an overall low profile. The rocker pin based design allows flexibility in platform design without compromising overall system performance.

The rubber foot assembly provides a high performance, shock absorbing, load introduction. The foot is made of yellow passivated st37 and uses hardened components at all bearing surfaces.

FEATURES

- Capacities: 250 2000kg
- Hardened components at all bearing surfaces
- Self aligning, rocker pin load introduction
- Stainless steel construction, suitable for harsh environments
