

Weil viele unterschiedliche elektronische und elektrische Geräte und Anlagen gleichzeitig betrieben werden, sind hohe Anforderungen an ihre Elektromagnetische Verträglichkeit (EMV) zu stellen. Seit 1.1.1996 gelten mit der EG-Richtlinie verbindliche EMV-Schutzziele.

Siemens Matsushita Components hilft, sie einzuhalten und hat dafür ein umfangreiches Programm innovativer, nutzenoptimierter EMV-Komponenten entwickelt. Darunter sind auch viele standardisierte Bauelemente, die mit ihren Fertigungs-, Kosten- und Liefervorteilen ein breites Anwendungsspektrum optimal abdecken.

SMD-Induktivitäten für anspruchsvolle Anwendungen

Langjährige Erfahrung und eine strikte Kundenorientierung kommen unserem SMD-Drosselprogramm zugute.

HF-SMD-Drosseln mit erstklassigen elektrischen Eigenschaften sind jetzt in den Baugrößen 0603 bis 2220 verfügbar. Sie gewährleisten eine hohe Packungsdichte und leisten damit einen wertvollen Beitrag zur Miniaturisierung, u. a. in der Telekommunikation, Automobilelektronik, MSR-Technik und in Industrieanwendungen.

S + M Components bietet nicht nur das breiteste Spektrum an SMD-Induktivitäten, sondern ist aufgrund der herausragenden Zuverlässigkeit dieser Bauelemente die Nummer 1 im Markt der europäischen Kfz-Elektronik-Hersteller.

Datenleitungsdrosseln werden in der Telekommunikation, Automobilelektronik sowie der Gebäude- und Automatisierungstechnik eingesetzt.

In der Kfz-Elektronik setzen sich CAN-Bussysteme immer mehr durch. S + M Components liefert zur Beschaltung der Schnittstellen SMD-Datenleitungsdrosseln und ist auf diesem Gebiet weltweit die Nummer 1.

In der Telekommunikation werden SMD-Datenleitungsdrosseln mit großem Erfolg in ISDN-Systemen eingesetzt.

Alle Entstörungsvorteile im Netz

Wenn leitungsgebundene Störungen zu verhindern sind oder Störfestigkeit erzielt werden muß, hat S + M Components die richtigen Produkte für Ihre Anwendungen.

X-/Y-Kondensatoren werden kontinuierlich weiterentwickelt. Speziell durch Innovationen bei den Folienkondensatoren werden diese Bauelemente immer kleiner und preisgünstiger – natürlich ohne Kompromisse bei der Qualität und den Eigenschaften.

D-Kern-Drosseln unterdrücken wirkungsvoll leitungsgebundene Störungen in Schaltnetzteilen, beispielsweise von EVGS und TV-Geräten. Sie zeichnen sich durch geringen Platzbedarf, gute HF-Eigenschaften und ein kleines Streufeld aus.

Mit neuester Technologie werden sie ohne Verguß und Klebematerialien hergestellt, wodurch sie sehr umweltfreundlich und gut recycelbar sind. Der hohe Automatisierungsgrad ermöglicht darüber hinaus exakt reproduzierbare elektrische und mechanische Eigenschaften sowie niedrige Herstellungskosten.

Filter zur Entstörung von Geräten und Systemen werden als Standardfilter und in kundenspezifischen Varianten angeboten.

Unsere SIFI-Filter z. B. sind standardisierte Baureihen in kostengünstig aufgebauter Leiterplattentechnik. Sie sind in verschiedenen Dämpfungs- und Stromabstufungen sowie unterschiedlichen Gehäuseformen erhältlich, so daß in praktisch jedem Fall die genau passende Lösung schnell zur Verfügung steht.

Umrichterfilter werden bei Stromversorgungen, USV-Anlagen und medizinischen Einrichtungen mit IGBT-Leistungshalbleitern eingesetzt.

Hier ist ein völlig neues Marktsegment entstanden, das S + M Components dank seines breiten, innovativen Produktspektrums entscheidend mitgeprägt hat. Damit gehört das Unternehmen auf diesem Gebiet zu den führenden Herstellern in Europa.

Das Angebot reicht schon bei Standardausführungen von 8 bis 1600 A in 2-, 3- oder 4-Leiter-Technik. Diese Filter sind unter Vollastbedingungen optimiert und 1- oder 2-stufig lieferbar. Filter für Industrienetze mit 690 Vac sind die neueste Entwicklung.

Filter für Anlagen und geschirmte Räume

Geschirmte Räume schützen einerseits gegen elektromagnetische Felder, müssen andererseits jedoch auch mit Energie versorgt werden und kommunikationsfähig bleiben. S + M Components stellt anspruchsvolle, kostengünstige Filterlösungen her, die dieser Aufgabe voll gerecht werden.

Komplett-Angebot von EMV-Systemlösungen zu umfassenden Dienst- und Betreuungsleistungen

Über Standardbauelemente und kundenspezifische Lösungen hinaus bietet S + M Components geschirmte Kabinen von 1 kHz bis 40 GHz, Schirmungsbauteile, wie Türen und Fenster sowie vollständig ausgestattete Absorberhallen an. Ergänzt wird dieses Angebot durch das EMV-Labor in Regensburg, das mit hochqualifizierten Dienstleistungen der ideale Partner bei allen EMV-Problemen und Aufgaben ist.

Das eigene Dienstleistungsangebot wird abgerundet durch eine europaweite Zusammenarbeit mit anderen führenden EMV-Labors. Dadurch kann allen Kunden eine flächendeckende Design-in-Unterstützung auf höchstem Niveau angeboten werden.

Designing the Future

The simultaneous operation of many different items of electrical and electronic equipment makes high demands on their electromagnetic compatibility (EMC). The EU Directive on EMC has made it mandatory to implement relevant protection measures as of January 1st 1996.

In order to satisfy these requirements, Siemens Matsushita Components has developed an extensive program of innovative EMC components designed specifically for this purpose. They include many standardized components optimized for a broad range of applications and offering particular benefits in terms of production, cost and delivery conditions.

SMD inductors for demanding applications

Many years of experience coupled with strict orientation to customer needs have led to the production of an outstanding range of SMD chokes.

RF SMD chokes with first-class electrical properties are now available in sizes 0603 to 2220. They guarantee a high packing density and thus make a significant contribution to miniaturization in applications as diverse as telecommunications, automotive electronics, process control technology and industrial electronics.

Siemens Matsushita Components not only offers the widest range of SMD inductors, their outstanding reliability have also made it the market leader among European manufacturers of automotive electronics.

Data line chokes are used in telecommunications, automotive electronics as well as structural and automation technology.

CAN bus systems are becoming increasingly popular in automotive electronics. Siemens Matsushita Components supplies SMD data line chokes for interfaces and is world-wide leader in this sector.

In the field of telecommunications, SMD data line chokes are used with great success in ISDN systems.

Interference suppression benefits all along the line

Whenever conducted interference must be prevented or interference immunity must be achieved, Siemens Matsushita Components has just the right products for your applications.

X/Y capacitors are being continuously developed. Thanks particularly to innovations in film capacitors, these components are becoming increasingly compact and inexpensive – naturally without compromising their quality or properties in any way.

D core chokes effectively suppress conducted interference in switched-mode power supplies, such as in electronic ballast systems and TV sets. They are distinguished by their low space requirement, good RF properties and small leakage fields.

State-of-the-art technology means that they are manufactured without encapsulation or the use of adhesive materials. This makes them extremely environmentally friendly and easy to recycle. The high degree of automation also permits exactly reproducible electrical and mechanical properties as well as low manufacturing costs to be achieved.

Filters for interference suppression in equipment and systems are offered both as standard components and in customer-specific variants.

Our SIFI filters, for example, are standardized components of cost-effective design in circuit board technology. They are available in various attenuation and current stages as well as different package designs so that the most suitable solution for practically every application is available in next to no time.

Converter filters are used in power supply units, UPS installations and medical equipment using IGBT power semiconductors.

Siemens Matsushita Components has contributed greatly to shaping this completely new market segment thanks to a broad range of innovative products. This places the company up front among the leading manufacturers in Europe in this sector.

The range of standard versions alone extends from 8 to 1600 A in 2, 3 or 4-line technology. These filters are optimized under full load conditions and can be supplied in one or two-stage versions. The most recently developed components are filters for industrial networks operating at 690 Vac.

Filters for EMC installations and shielded rooms

Although shielded rooms are designed to provide protection against electromagnetic fields, they must also be supplied with energy and allow two-way communications. Siemens Matsushita Components manufactures sophisticated and attractively priced filter solutions that fully satisfy these requirements.

A complete range of EMC system solutions for a comprehensive range of service and support functions

In addition to standard components and customized solutions, Siemens Matsushita Components also offers shielded enclosures from 1 kHz to 40 GHz, shielding parts such as doors and windows as well as fully-equipped anechoic chambers.

This offer is supplemented by the EMC laboratory in Regensburg, whose highly-qualified services make it the ideal partner for all EMC problems and assignments.

Siemens Matsushita Component's own range of services is rounded off by its cooperation with other leading EMC laboratories all over Europe. This means that all our customers can obtain top-level support for the full range of their design project.

Further information about our products can be obtained on the Internet under <http://www.siemens.de/pr/index.htm>. If you would like to talk to one of our specialist consultants, simply contact your local Siemens company or sales office.

1) Anstelle + ist der Kennbuchstabe für die gewünschte Induktivitätstoleranz einzusetzen. Engere Toleranzen auf Anfrage.
(Angabe ist die Bestellnummer für Rollengröße Ø 180 mm; für Ø 330 mm ist zusätzlich die Kennziffer „8“ anzufügen. Beispiel: B82412-A3100-M8)
Replace the + by the code letter for the required inductance tolerance. Closer tolerances upon request.
(The listed ordering codes are for reel size Ø 180 mm; for Ø 330 mm append code number "8". Example: B82412-A3100-M8)

1) Anstelle + ist der Kennbuchstabe für die gewünschte Induktivitätstoleranz einzusetzen. Engere Toleranzen auf Anfrage.
(Bestellnummer für Rollengröße Ø 180 mm; für Ø 330 mm steht an letzter Stelle die Kennziffer „8“. Beispiele: B82422-A3829-K108, B82422-T1332-K8)
Replace the + by the code letter for the required inductance tolerance. Closer tolerances upon request.
(The listed ordering codes are for reel size Ø 180 mm; for Ø 330 mm the last digit of the ordering code has to be an "8".
Examples: B82422-A3829-K108, B82422-T1332-K8)

Baureihe SIMID 02

Die Baugröße 1210 ist auch mit **versilberten** Anschlüssen lieferbar.

- Unterschiedliche Meßfrequenzen für L und Q
- $L_N = 0,0082 \dots 100 \mu\text{H}$
- $I_N = 65 \dots 700 \text{ mA}$

SIMID 02 series

Size 1210 is also available with **silver-plated** terminals.

- Different measuring frequencies for L and Q
- $L_R = 0,0082 \dots 100 \mu\text{H}$
- $I_R = 65 \dots 700 \text{ mA}$

HF-Drosseln RF Chokes

Baugröße 1812
Size 1812

Baureihe SIMID 03

HF-Drosseln RF Chokes

Bedrahtet / Leaded
Small-Bobbin-Core

Baureihe SBC

■ Mini-Rollenkern aus Ferrit

Maße (mm) $\varnothing \times l$: 3,0 × 6,8
IEC-Klimakategorie 55/125/56
Lieferform axial oder radial
gegurtet
Rastermaß axial: min. 10 mm
radial: 5 mm

SBC series

■ Mini ferrite bobbin core

Dimensions (mm) $\varnothing \times l$: 3,0 × 6,8
IEC climatic category 55/125/56
Delivery mode axially or radially
taped
Lead spacing axial: min. 10 mm
radial: 5 mm

HF-Drosseln RF Chokes

Bedrahtet / Leaded
Bobbin-Core

Baureihe BC

■ Rollenkern aus Ferrit

Baureihe HBC

■ BC-Drossel mit höherem Nennstrom

Maße (mm) $\varnothing \times l$: 4,0 × 9,2
IEC-Klimakategorie 55/125/56
Lieferform axial oder radial
gegurtet
Rastermaß axial:
min. 12,5 mm
radial: 5 mm

BC series

■ Ferrite bobbin core

HBC series

■ BC choke with higher rated current

Dimensions (mm) $\varnothing \times l$: 4,0 × 9,2
IEC climatic category 55/125/56
Delivery mode axially or radially
taped
Lead spacing axial:
min. 12,5 mm
radial: 5 mm

HF-Drosseln RF Chokes

Bedrahtet / Leaded
Large-Bobbin-Core

Baureihe LBC

- Großer Rollenkern aus Ferrit

Maße (mm) $\varnothing \times l$: 5,2 × 12
IEC-Klimakategorie 55/125/56
Lieferform axial gegurtet
Rastermaß min. 15 mm

Baureihe HLBC

- LBC-Drossel mit höherem Nennstrom

Maße (mm) $\varnothing \times l$: 6,5 × 12

LBC series

- Large ferrite bobbin core

Dimensions (mm) $\varnothing \times l$: 5,2 × 12
IEC climatic category 55/125/56
Delivery mode axially taped
Lead spacing min. 15 mm

HLBC series

- LBC choke with higher rated current

Dimensions (mm) $\varnothing \times l$: 6,5 × 12

Drosseln für Signal- und Datenleitungen

Chokes for Signal and Data Lines

SMD-Bauformen

- Stromkompensierte SMD-Drosseln
- Kernmaterial: Ferrit-Ringkern

Nennspannung 42 V~/80 V-
 L-Toleranz ±30%
 IEC-Klimakategorie 40/125/56
 Lötbarkeit IR-/Vapor-Phase
 Lieferform: Blistergurt 16 bzw. 24 mm

SMD types

- Current-compensated SMD chokes
- Core material: ferrite ring core

Rated voltage 42 Vac/80 Vdc
 L tolerance ±30%
 IEC climatic category 40/125/56
 Solderability IR/vapor phase
 Deliv. mode: Blister tape 16 or 24 mm

Drosseln für Netzanwendungen

Chokes for Power Lines

Stromkompensierte Ringkerndrosseln

Current-compensated ring core chokes

Dreifach-Drosseln

- Kunststoffbecher (B82747)
- Aluminiumbecher (B82745)
- Vergossen (UL 94 V-0)

Nennspannung 440/250 V~
 L-Toleranz ±30%
 IEC-Klimakategorie 40/125/56
 Prüfzeichen (für 6 ... 16 A)

Triple chokes

- Plastic case (B82747)
- Aluminum case (B82745)
- Potted (UL 94 V-0)

Rated voltage 440/250 Vac
 L tolerance ±30%
 IEC climatic category 40/125/56
 Approvals (for 6 ... 16 A)

Filter für allgemeine Anwendungen

General-Purpose Filters

Baureihe SIFI

- Zwei-Leiter-Filter
- Aluminiumgehäuse
- Vergossen (UL 94 V-0)
- Alle relevanten Prüfzeichen

Anschluß-Varianten (Gehäuseformen):

- A: Beidseitig Flachstecker, Befestigungslaschen längsseitig
- B: Beidseitig Flachstecker, Befestigungslaschen stirnseitig
- K: Netzseitig IEC-Stecker, lastseitig Flachstecker
- L: Beidseitig Litzenanschlüsse
- P: Anschlußstifte im Rastermaß

Nennspannung 250 V~, 50/60 Hz
IEC-Klimakategorie 25/085/21

SIFI series

- Two-line filters
- Aluminum case
- Potted (UL 94 V-0)
- All relevant approvals

Terminal styles (case styles):

- A: Tab connectors on face ends, lateral mounting tabs
- B: Tab connectors on face ends, mounting tabs on face ends
- K: IEC connector on line side, tab connector on load side
- L: Litz wires on face ends
- P: Pins fitting standard PCB grid

Rated voltage 250 Vac, 50/60 Hz

Filter für allgemeine Anwendungen

General-Purpose Filters

Filter für Leiterplattenbestückung

- Netzfilter für Einphasen-Systeme
- Kunststoffgehäuse
- Vergossen (UL 94 V-0)

Nennspannung 250 V~, 50/60 Hz
IEC-Klimakategorie 25/085/21

Filters for PCB mounting

- Power line filters for single-phase systems
- Plastic case
- Potted (UL 94 V-0)

Rated voltage 250 Vac, 50/60 Hz
IEC climatic category 25/085/21

| I_N I_R A | C_N C_R | L_N L_R | I_{Abl} I_{leak} mA | Maße Dimensions $l \times b \times h$ (mm) | Bestellnummer Ordering code | Approbationen Approvals | | |

Kompaktfilter mit IEC-Stecker

- Netzfilter für Einphasen-Systeme
- Filter mit IEC-Stecker, Sicherungshalter und Schalter

Nennspannung 250 V~, 50/60 Hz
IEC-Klimakategorie 25/085/21

Compact filters, IEC connector

- Power line filters for single-phase systems
- Filters with IEC connector, fuse holder and switch

Rated voltage 250 Vac, 50/60 Hz
IEC climatic category 25/085/21

| I_N I_R A | C_N C_R | L_N L_R | I_{Abl} I_{leak} mA | Maße Dimensions $l \times b \times h$ (mm) | Bestellnummer Ordering code | Approbationen Approvals | | |

Filter für Anlagen und Systeme

Filters for Installations and Systems

Filter mit LF-Entstörung

- Netzfilter für Einphasen-Systeme mit zusätzlicher LF-Entstörung
- Zwei-Leiter-Filter
- Metallgehäuse
- Vergossen (UL 94 V-0)
- Litz-Anschlüsse

Nennspannung 250 V~, 50/60 Hz
IEC-Klimakategorie 25/085/21

Filters with LF suppression

- Power line filters for single-phase systems with add. LF suppression
- Two-line filters
- Metal case
- Potted (UL 94 V-0)
- Litz wires

Rated voltage 250 Vac, 50/60 Hz
IEC climatic category 25/085/21

| I_N I_R A | R_{typ} mΩ | I_{Abl} I_{leak} mA | Maße Dimensions $l \times b \times h$ (mm) | Bestellnummer Ordering code | Approbationen Approvals | | |

| 36 | 12 | > 3,5 | 183,0 × 84,0 × 67 | B84299-K67 | | | |

Filter mit VHF-Entstörung

- Netzfilter für Einphasen-Systeme mit zusätzlicher VHF-Entstörung
- Zwei-Leiter-Filter
- Metallgehäuse
- Berührungssichere Anschlußklemmen

Nennspannung 250 V~, 50/60 Hz
IEC-Klimakategorie 25/085/21

Filters with VHF suppression

- Power line filters for single-phase systems with add. VHF suppression
- Two-line filters
- Metal case
- Safe-to-touch terminal blocks

Rated voltage 250 Vac, 50/60 Hz
IEC climatic category 25/085/21

| I_N I_R A | I_{Abl} I_{leak} mA | Maße Dimensions $l \times b \times h$ (mm) | Bestellnummer Ordering code | Approbationen Approvals | | |

Filter für Anlagen und Systeme

Filters for Installations and Systems

Hohe Einfügungsdämpfung

- Netzfilter für Dreiphasen-Systeme
- Vier-Leiter-Filter im Kunststoff- bzw. Metallgehäuse
- Vergossen (UL 94 V-0)
- Berührungssichere Anschlußklemmen

Nennspannung 440/250 V~,
50/60 Hz
IEC-Klimakategorie 25/085/21

High insertion loss

- Power line filters for three-phase systems
- Four-line filters in plastic case or metal case
- Potted (UL 94 V-0)
- Safe-to-touch terminal blocks

Rated voltage 440/250 Vac,
50/60 Hz
IEC climatic category 25/085/21

| I_N I_R A | I_{Abl} I_{leak} mA | Maße Dimensions $l \times b \times h$ (mm) | Bestellnummer Ordering code | Approbationen Approvals | | |

Filter für 400-Hz-System 208/120 V einsetzbar.
 $I_{max} = 0,5 \cdot I_N$. Auf erhöhten Blindstrom/Ableitstrom achten!

Filters also suitable for 400-Hz system 208/120V.
 $I_{max} = 0,5 \cdot I_N$. Reactive/leakage current will increase!

1) Filter B8426*-A... zur Direktmontage an Schirmwand mit Einschweißflansch (Einschweißflansch B83208-A-Z808 nicht im Lieferumfang)
 Filter B8426*-C... beidseitig bestückt mit Kabelverschraubungen bzw. HF-dichtem Anschluß an Schirmwand mit flexibler Anschlußarmatur
 Filter B8426*-A... for direct mounting on shielded wall by welding flange (welding flange B83208-A-Z808 not included in delivery)
 Filter B8426*-C... with screw-type cable glands on both sides or for RF-tight connection to shielded wall by flexible fitting

Durchführungsfilter Feed-through Filters

Filter für niedrige Ströme

- Kostengünstige Entstör-
lösung
- Keramik-Technologie

IEC-Klimakategorie 40/085/21

Low-current filters

- Cost-effective solution for
EMI suppression
- Ceramic technology

IEC climatic category 40/085/21

EMV-Labor

EMC Laboratory

Um eine Vielzahl elektrischer Geräte und Anlagen nebeneinander betreiben zu können, muß das Schutzziel „Elektromagnetische Verträglichkeit“ (EMV) erreicht werden. Das deutsche EMV-Gesetz sowie die Europäische EMV-Richtlinie schreiben dieses Schutzziel zwingend vor. Europäische und nationale Normen schreiben technische Anforderungen an Geräte sowie Meß- und Prüfverfahren fest. Sie enthalten z. B. die einzuhaltenden Grenzwerte für die Störaussendung und die Schärfegrade für die Störfestigkeit.

In Regensburg betreiben wir ein umfangreich ausgestattetes EMV-Labor für die Unterstützung unserer Kunden bei Entstörproblemen und für grundlegende Untersuchungen bei der Applikation von EMV-Bauelementen. Dort werden für Geräte, Anlagen und Maschinen die wirtschaftlich günstigsten Entstörbeschaltungen ermittelt.

Unser EMV-Labor in Regensburg bietet Ihnen umfassende und fachlich hochqualifizierte EMV-Dienstleistungen:

- Entwicklungsbegleitende Beratung und Schulung
- EMV-Messungen und -Prüfungen an Prototypen
- EMV-Prüfungen für die Konformitätserklärung zur CE-Kennzeichnung
- Abnahmemessungen der Seriengeräte

Die umfassende Ausstattung des Labors, unsere langjährige Erfahrung und hohe EMV-Kompetenz (erste Absorberhalle Europas 1963) sowie aktive Mitarbeit in nationalen und internationalen EMV-Normungsgremien bilden eine hervorragende Grundlage, den hohen Anforderungen unserer Kunden gerecht zu werden.

EMV-Prüfungen

Unser EMV-Labor kann nach nahezu allen gültigen nationalen und internationalen Normen prüfen. Selbstverständlich sind darüber hinaus auch Prüfungen nach anderen einschlägigen EMV-Vorschriften durchführbar.

Qualifikation

Das EMV-Labor ist akkreditiert nach den Richtlinien des DAR (Deutscher Akkreditierungs Rat) und Mitglied in der Zuständigen Stelle der Siemens AG (ZFE GR TN ZF) gemäß EMV-Gesetz.

In order to be able to operate a large number and variety of electrical devices simultaneously, the protection-oriented objective of "Electromagnetic compatibility" (EMC) must be achieved. The German EMC law and the European EMC Directive make this objective mandatory. European and national standards specify the technical requirements for equipment as well as the related measuring and testing methods. For example, they specify the mandatory limits for interference emissions and the severity of immunity tests.

We operate an extensively equipped EMC laboratory in Regensburg to support our customers in solving interference problems and for carrying out fundamental research on EMC component applications. In this lab, the most economical interference suppression circuits for devices, plants and machineries are determined.

Our EMC laboratory offers the producer of electrical equipment comprehensive and highly qualified service:

- Advisory and training services accompanying the development phase
- EMC testing of prototypes
- EMC tests to enable a declaration of conformity to be made for the CE mark
- Acceptance inspection of industrial equipment

The all-inclusive facilities of the laboratory, many years of experience and specialist competence in the entire field of EMC (Europe's first anechoic chamber in 1963) plus active cooperation on national and international EMC standards committees all combine to form a solid foundation for satisfying the high demands set by the customer.

EMC tests

The EMC laboratory in Regensburg can conduct tests to virtually all national and international EMC standards. Tests in line with other valid EMC requirements are also possible of course.

Qualification

The EMC laboratory is accredited according to the directives of the GAR (German Accrediting Council) and a member of the competent body of Siemens AG (ZFE GR TN ZF) as prescribed by EMC legislation.

Störfeldstärkemessung mit Spectrum Analyzer und Meßempfänger
Measuring radiated emission with spectrum analyzer and test receiver

Automatische Messung mit Zugriff zu allen Meßplätzen
Automatic tests with access to all test setups

Ausstattung

■ Absorberhalle

Das EMV-Labor verfügt über eine Absorberhalle mit reflektierendem Boden für Feldstärkemessungen nach allen einschlägigen Meßvorschriften bei Meßabständen bis 10 m.

Die Absorberhalle ist an den Wänden und der Decke partiell mit Schachtabsorbern ausgekleidet, um eine reflektionsfreie Meßumgebung zu schaffen. Für Störfestigkeitsuntersuchungen können Felder bis etwa 20 V/m in 2 m Abstand erzeugt werden. Zusätzliche mobile Absorber können je nach Meßproblem als Wand- und Bodenabsorber eingesetzt werden. Die Halle eignet sich auch für die Prüfung größerer Objekte, z. B. von EDV-Anlagen oder Kraftfahrzeugen.

■ Meßplätze

Für Untersuchungen leitungsgebundener Störungen stehen zwei geschirmte Kabinen mit drei Meßplätzen zur Verfügung.

Um jederzeit genaue und reproduzierbare Messungen gewährleisten zu können, werden die Meß- und Prüfeinrichtungen jährlich kalibriert und regelmäßig mit unseren internen Vergleichsnormen überprüft.

Jeder der drei Meßplätze kann alternativ mit den eigenen Meßgeräten oder mit dem zentralen, automatisierten Meßgerät arbeiten. Die Meßergebnisse werden mit Hilfe eines Plotters dokumentiert.

Meß- und Prüfgeräte für strahlungsgebundene EMV

Aussendung

| | |
|-------------------|---------------------|
| Meßempfänger | 10 kHz ... 1000 MHz |

| Leistungsverstärker | 25 W ... 250 W |
| Impulsgeneratoren | ESD EN 61000-2 |
| | Burst EN 61000-4 |
| | Surge EN 61000-5 |

Ankoppelnetzwerke, kapazitive Koppelzange

Equipment

■ Anechoic chamber

The EMC laboratory incorporates an anechoic chamber with a reflecting floor (ground plane) for measurement of field strength according to all regulations at distances up to 10m.

The anechoic chamber is partially lined with shaft absorbers on its walls and ceiling to create a testing environment that is free from reflections. For examinations of immunity it is possible to generate fields of some 20 V/m at a distance of 2 m. Depending on the application, extra mobile absorbers can be wheeled in for walls or the floor. The chamber is also suitable for testing large objects, even complete computer installations or automobiles.

■ Shielded enclosures

For investigations of conducted interference there are two shielded enclosures with three test stations.

To ensure precise and reproducible measured results at all times, test facilities are calibrated annually and regularly examined with inhouse reference standards.

Each of the three test stations can work either with its own or with automated, central instrumentation. All results are documented by a plotter.

Test equipment for radiated EMC

Emission

| | |
|--------------------|---------------------|
| Test receivers | 10 kHz ... 1000 MHz |
